

## **Outcomes-Based Teaching and Learning (OBTL) for EEE Final Year Project**

### **Appendix 1: Assessment Criteria for Approach During the Year**

| <b>Criteria</b>         | <b>Details</b>            | <b>Fail standard<br/>(0-40%)</b>                                                        | <b>Pass standard<br/>(41-74 %)</b>                                                               | <b>High standard<br/>(75-100 %)</b>                                                                                           |
|-------------------------|---------------------------|-----------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Interim Assessment (20) | Project Plan/Strategy (7) | Unable to plan activities to complete tasks assigned, even after supervisor's feedback. | Able to make reasonable research plan to achieve the goals, with help from supervisor if needed. | Able to plan research activities with minimal supervision. The plan is clear and reasonable with proper background knowledge. |
|                         | Interim Report (13)       | Unable to complete the interim report on time, even after supervisor's feedback.        | Able to complete the interim report but lacking in content, understandings and logic.            | Able to complete the interim report with good content, understandings and logic, and well written.                            |

### **Appendix 2: Assessment Criteria for Final Report and Presentation**

| <b>Criteria</b>                                  | <b>Details</b>                                                                                                                      | <b>Fail standard<br/>(0-40%)</b>                                                                                                                                                                                                        | <b>Pass standard<br/>(41-74 %)</b>                                                                                                                                                           | <b>High standard<br/>(75-100 %)</b>                                                                                                                                                                                                                                                     |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Report, demonstration and oral presentation (40) | Presentation (English, structure and organization of final report). Reference list and proper acknowledgement of others' works (11) | Many typos and grammatical errors with poorly constructed sentences. Layout of report is not logical and report is not properly formatted. Few and not up to date references are listed. Lack of citing in literature review of report. | Some typos and grammatical errors. Layout and order of report is acceptable and reasonable logical and report is properly formatted. Adequate references are listed and cited in the report. | No typos or errors of any kind. Properly constructed sentences. Layout and order of report is good and logical. The chapters are well-organized and report is properly formatted. Good or excellent references are listed and cited in the literature review and throughout the report. |

|  |                                                                                                   |                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                  |
|--|---------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | Introduction, theory, review of and comparison with relevant Work. Discussion and Conclusion (12) | Review provides no or inappropriate background information, adds no or inappropriate context to the project; no identification or misinterpretation of key concepts and theories. No conclusions drawn; related outcomes are oversimplified, even after supervisor's feedback. | Review provides appropriate background information to add context to the research project, without diverging too much from topics which are directly linked; shows an understanding of the key concepts and theories. Conclusions are made, but lacking in understandings and logic. | Review provides excellent and relevant background information to add context to the project; shows clear understanding of key concepts and theories, and interpretation of wider context issues. Conclusions are made in connection with the results and suggestions for future work. Highlight some limitation of current work. |
|  | Demonstration interview and oral presentation (17)                                                | Poor content and slide design. Presentation sequence is not logical. Unable to understand and answer questions even after supervisor's feedback.                                                                                                                               | Adequate content, average slide design, and reasonable depth of explanation. Able to understand and answer some questions.                                                                                                                                                           | Logical sequence, able to highlight major outcomes and offer good explanation, substantial effort in slide design. Able to understand and answer most questions.                                                                                                                                                                 |

### Appendix 3: Assessment Criteria for Development, Achievement and Conclusion

| Criteria                                                           | Details                                                                                                                                                  | Fail standard (0-40%)                                                                                                                                                                                                                              | Pass standard (41-74 %)                                                                                                                                                                                                      | High standard (75-100 %)                                                                                                                                                                                                                                  |
|--------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Approach during year, development, achievement and conclusion (40) | General initiative and sense of professional and ethical responsibility. Updating supervisor regularly. (8)                                              | Poor initiative, relying on supervisor. No responsibility in making decisions, even after supervisor's feedback. No regular updates to supervisor on progress of work.                                                                             | Make initiative to meet the goals and scope of the project. Able to take responsibility in making some decisions. Update supervisor adequately.                                                                              | Able to take good or excellent initiative and decision to achieve the goals and scope of work for most of project duration. Provided regular updates on project.                                                                                          |
|                                                                    | Analysis of all factors in the problem. Design and implementation; data collection and processing. Results, quality of work and level of Complexity (24) | Poor analysis and not all the factors are considered, even after supervisor's feedback. No application of research methods; inappropriate use of experimental technique; major errors in data collection. No relevant results and poor discussion. | Adequate analysis and some factors are considered. Apply research methods such as design of experiments; select and use appropriate experimental techniques; demonstrates competency in data collection and understanding of | The factors are logically analyzed; trends are identified with further discussion. Apply research methods such as design of experiments; select and use appropriate experimental techniques; demonstrates mastery in data collection and understanding of |

|  |                                                                                                                                                      |                                                                                                                                                                                 |                                                                                                                                                                                         |                                                                                                                                                                                                                                  |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |                                                                                                                                                      |                                                                                                                                                                                 | tools/software/methods used. Relevant results and adequate discussion are presented.                                                                                                    | tools/software/methods used and its limitations. New and interesting results with good discussion.                                                                                                                               |
|  | Ability and independence. Ability to extend ideas and expand on suggestions. Efforts, contribution to project, outcome, and level of achievement (8) | Poor ability and not independent. Unable to extend ideas or expand on suggestions, even after supervisor's feedback. No effort or contribution to project. Lack of achievement. | Good ability and shows independence. Able to partially extend ideas and expand on suggestions with basic understanding. Good efforts, contributed to project and have good achievement. | Demonstrates good capability and independence. Able to extend ideas and expand on suggestions with good understanding. Put in great efforts, good or excellent contribution to project and attain good or excellent achievement. |
